

Managed Network Security

Powered by SonicWall Business Class Firewall

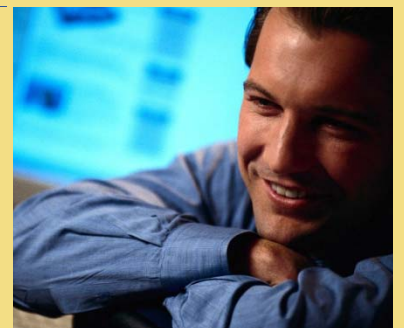

ITX installs firewall appliances & software – and proactively, routinely, and remotely monitors your network. We offer a wide choice of solutions and monthly rates, based on your business size and needs.

Managed Firewall services include:

- Virtual Private Networks (VPN) access
- Gateway anti-spyware & anti-virus
- Intrusion Prevention Service
- Weekly activity reports
- Content filtering
- Security audits & penetration testing
- Secured wireless solutions
- Network anti-virus enforcement

To prevent:

- Viruses & spyware
- Internet attacks
- Identify theft
- Network intrusions
- Information theft
- Backdoor exploits
- Lost productivity
