ITX implements ShoreTel VoIP system for National Park Service

Fort Collins, Colorado, November 29, 2006 – Information Technology Experts, Inc. (ITX) today announced that the National Park Service hired ITX to implement a new ShoreTel Voice over Internet Protocol (VoIP) phone system for 300+ staff located at their Fort Collins site. Implementation was successfully completed in October.

“This was a competitive bid and ITX is excited to win our first Federal government VoIP contract,” said Dan Gallegos, ITX Director of VoIP. “We worked closely with their network administrators to provide a very smooth migration – plus, our implementation schedule minimized down time. To save costs long-term, the staff and administrators were trained to enable the NPS to manage their new VoIP system themselves.”

About ITX

ITX is northern Colorado’s leading full-service IT support provider. Founded in 1996 by Mai Tran and Bruce Hottman, ITX has 120 employees and posts a 31% annual average growth rate. ITX serves over 140 commercial and government clients from offices in Fort Collins, Denver, Washington, DC, and client locations nationwide. ITX core competencies include: network administration, database & software development, network security, hosting, and VoIP/telecommunications.
